

THE MOST DOMINANT FORCE IN NATURE HURRICANE

Spray Force is the ONLY manufacturer that uses a self-compensating hydraulic system

HURRICANE 350 XR1

HURRICANE LINEUP

Every Hurricane machine includes:

- Self-compensating hydraulic pumps
- The most technically advanced oil system on the market
- Concealed hydraulic hoses for your safety
- State-of-the-art flow control system
- Top quality Quincy compressor
- Heavy duty chrome & stainless steel components
- World class torque-flex axle suspension trailer

COMPETITOR'S SHORTCUTS REVEALED

- Cheaper gear pump hydraulic system w/ inferior flow divider reduces equipment life
- Inferior oil system
- Exposed hydraulic hoses
- Short-life rubber & plastic components
- Light weight tanks use thinner gauge metal
- Under horsepower equipment & shorter life stator tubes
- Leaf-spring axle trailer for a harsh ride
- Spot welded frame with minimal stability
- Splash lubricated compressor reduces life
- Smaller tank shafts reduce equipment durability

In two decades and with over 2,000 units in service, no Spray Force self-compensating pumps have worn out!
