

POWERMIX 912 SPECS

Industry professionals choose Spray Force for our innovation, experience, and five decades of proven quality. Compare our specifications and ask us how Spray Force equipment is different.

MORTAR, PLASTER, AND FIREPROOFING MIXER

- 13 HP Kohler rope-start engine with oil sentinel to prevent damage from low oil
- Heaviest duty hinged hood for full access to drive components
- Proprietary Helically designed gears for smoother drive and longer gear life
- Cast steel transmission and clutch housing directly coupled to mixer shaft and engine, eliminating need for belt, pulleys, or chains.
- Torque-flex axle
- Heavy duty 14" wheels
- Able to mix material quickly, consistently, thoroughly, and splash free
- Full forward and reverse swing for easy dumping and clean-up
- Standard 20 inch spout with full spout available if specified
- 14 cubic foot heavy gauge steel mixer bowl counter balanced for easy dumping
- 1-5/8" mixer shaft the largest and heaviest duty in the business
- Smoothest and longest lasting bearings in the industry with a large mud flap for added protection
